

At **Specialist Hearing Services**, we really are

## *hear for you*

Unfortunately one in six Australians experience hearing loss to some degree (Access Economics, 2006) and 1-2% of the Australian population experience significant, debilitating tinnitus which can interfere with sleep, making it difficult to concentrate or relax, increase sensitivity to loud sounds and lead to anxiety and depression.

Untreated hearing loss can adversely affect a person's social, emotional, psychological and physical well being. These same affects can also be experienced by the person's family and friends.

**Specialist Hearing Services** can help.

We are university trained Audiologists dedicated to finding the best hearing or tinnitus treatment solutions for you.

We have the skills and equipment to provide a comprehensive diagnostic evaluation or your hearing and provide the best advice for your hearing needs. As an independent practice we can source all brands and styles of hearing devices at competitive prices.

**Specialist Hearing Services** is an accredited provider of the Neuromonics Tinnitus Treatment program - the most effective tinnitus treatment program available.

## We provide...

### Hearing Tests

Specialised hearing testing for adults and children over 3 years of age. Some hearing losses are treatable and if this is the case, we will be able to advise you of the best medical options.

### Hearing Aids

We will only recommend hearing aids that best suit your hearing loss should you require one. We can provide all styles from the major manufacturers at affordable prices.

### Tinnitus Assessment and Treatment

We conduct thorough tinnitus assessments and advise if further medical referral is necessary. If appropriate we can provide the Neuromonics Tinnitus Treatment Program.

### Subsidised Services

**Specialist Hearing Services** is accredited with the Office of Hearing Services and can provide subsidised hearing tests and hearing aids for Pensioners or Department of Veterans Affairs card holders.

### Other Services

We also provide Work Cover and employment hearing tests, noise protection plugs, swim and musicians' ear plugs, amplified phones, blue-tooth compatible hearing systems, headphones, personal alarms, hearing aid batteries and much more.

# Meet our Audiologists

## ELAINE MELVILLE

Elaine founded Specialist Hearing Services in 2008 and has extensive knowledge and experience in all areas of audiology including:

- Cochlear Implants, and other Implantable Devices, hearing aids, Neuromonics Tinnitus Treatment and complex hearing assessments.
- Registered Nurse with over 18 years of experience and 19 years practice in Audiology.
- Member of Independent Audiologists of Australia and has a strong belief in ethical practice.

*"My experience, knowledge and strong belief in patient advocacy enable me to help people overcome their hearing loss. There's something special about helping someone re-connect with their world and their loved ones through better hearing."* **Elaine**

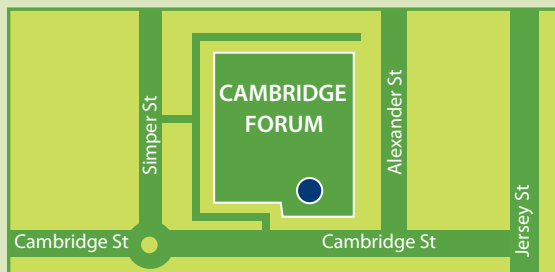

## HELEN GOULIOS

Helen has a 30 year career as a senior audiologist in Perth, Sydney and London specialising in:

- Diagnosis and management of patients with severe-profound hearing loss and high communication needs requiring more complex hearing devices.
- Adult hearing aid fitting and rehabilitation.
- Tinnitus and sound tolerance disorders.
- Hearing loss prevention in musicians, DJ's and other professionals working in high noise level environments.
